

**QUESTIONS AND ANSWERS**  
**RFQ # 15-012-20**  
**RENOVATION OF THE CRIMINAL JUSTICE CENTER**

Our firm is interested in the CJC Renovation project. Could you tell me the budget for this project and the total square footage to be renovated so that I can show experience similar in scope and size in our letter of interest?

We do not discuss the amount budgeted for a project and the square footage is approximately 325,000 sq.ft.

---

I had a quick question about the Criminal Justice project:

Other than the design & engineering aspects, has there been any discussion about the security controls of the jail being part of this project?

We are currently doing a security controls upgrade for the Juvenile facility, and I was there in Memphis in October and met with Rick Powell at 201 Poplar. Just wanted to get your take on the situation.

I am sorry but this is not in the scope of services.

---

I am touching base with you to see if the Criminal Justice project would have any storage requirements. I saw in the scope of work that there would be some Records Storage type of needs. As you may remember, We are a document and materials handling company and specialize in high density shelving systems, vertical automated carousels, lockers, static shelving, etc. I am attaching some literature for your review at this time. We are happy to help with CSI specifications, file/storage studies, drawings, elevations, load calculations, etc.

There is no storage requirement in the scope of work.
